Re: A Permanent Cap for the San Jacinto River Waste Pits is Important

Dear Mr. Miller:

I am writing to inform you that I support a permanent cap for the San Jacinto River Waste Pits. The best remedy for everyone is to make the temporary cap on the waste pits a permanent cap—this has been identified as Alternative 3. The temporary cap has never leaked since it was installed in July 2011.

Other alternatives under your consideration are too risky for those of us living outside the immediate area of the Superfund site. There is no good reason to make the area at risk larger than it is today. Any alternative other than Alternative 3 exposes the entire bay area to unwarranted risks.

I support a permanent cap because it is supported by science and common sense and what's in the best interests of the entire community.

Sincerely,

(b) (6)
